INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 2A31 BT PCT 2	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/FR2003/001829	International filing date (day/month/year) 17 juin 2003 (17.06.2003)	Priority date (day/month/year) 28 juin 2002 (28.06.2002)
International Patent Classification (IPC) or national classification and IPC H01Q 9/04, 5/00		
Applicant ANTENNES FT SOCIETE A RESPONSABILITE LIMITEE		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 5 sheets, including this cover sheet.

This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I Basis of the report
- II Priority
- III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV Lack of unity of invention
- V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI Certain documents cited
- VII Certain defects in the international application
- VIII Certain observations on the international application

Date of submission of the demand 24 janvier 2004 (24.01.2004)	Date of completion of this report 15 June 2004 (15.06.2004)
Name and mailing address of the IPEA/EP	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/FR2003/001829

I. Basis of the report

1. With regard to the elements of the international application:*

the international application as originally filed

the description:

pages 1-10, as originally filed

pages , filed with the demand

pages , filed with the letter of

the claims:

pages 1-7, as originally filed

pages , as amended (together with any statement under Article 19

pages , filed with the demand

pages , filed with the letter of

the drawings:

pages 1/1, as originally filed

pages , filed with the demand

pages , filed with the letter of

the sequence listing part of the description:

pages , as originally filed

pages , filed with the demand

pages , filed with the letter of

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).

the language of publication of the international application (under Rule 48.3(b)).

the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

contained in the international application in written form.

filed together with the international application in computer readable form.

furnished subsequently to this Authority in written form.

furnished subsequently to this Authority in computer readable form.

The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

the description, pages _____

the claims, Nos. _____

the drawings, sheets/fig _____

5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/R 03/01829

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-7	YES
	Claims		NO
Inventive step (IS)	Claims	1-7	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-7	YES
	Claims		NO

2. Citations and explanations

In substance, the subject matter of the invention is a patch antenna with two slots of differing tuning frequency, connected by a third slot.

The following features differentiate the available documents from the subject matter of the invention:

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/FR 03/01829

D1 describes an inverted F antenna and not a patch antenna. Said antenna resonates at two frequencies, given by La and Lb. There is no equivalent to the three slots of the invention.

D2 describes a double patch. There are no slots.

D3 describes an inverted F antenna (short-circuited patch) with slots of different lengths, but power is not supplied thereto via a third slot.

D4 describes a patch with two U-shaped slots, each resonating at a different frequency.

D5 describes a double patch, the upper patch of which is provided with a slot to improve its bandwidth.

D6, which appears to be the closest prior art, describes a patch with two slots of the same length and without a third slot.

The third slot of the application is not found in any of the available documents.

The claims therefore meet the PCT requirements of novelty and inventive step.
